Fall term and a freshman, Pat O'Connell, enters the new and challenging world of college.

Entering this new world requires registration and payment of fees,

setting up a good schedule of classes,

and meeting the new roommate,

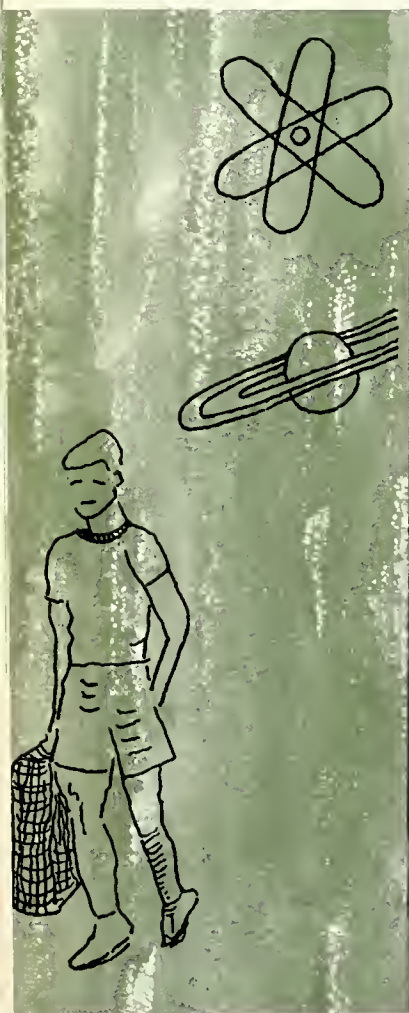

but the new student finds that studying is the most important part of this new world.

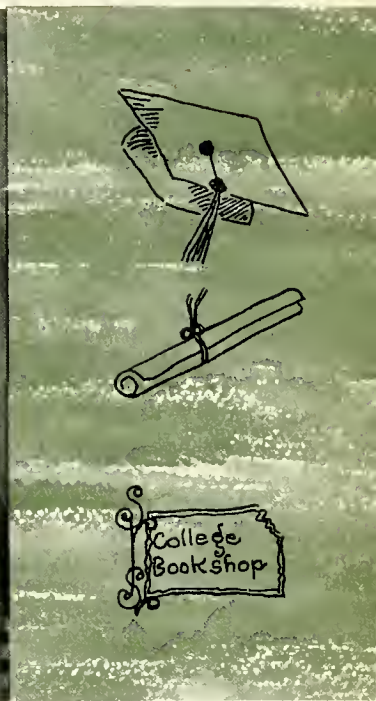

Tech's coeds are studious and beautiful. This is Alice Kupper, a civil engineering student.

Left: This is Pari Seirafi, shown with her husband, Farhad. They are from Iran. Right: This is Maritza Ramirez, shown with her brother, Carlos. They are from Venezuela.

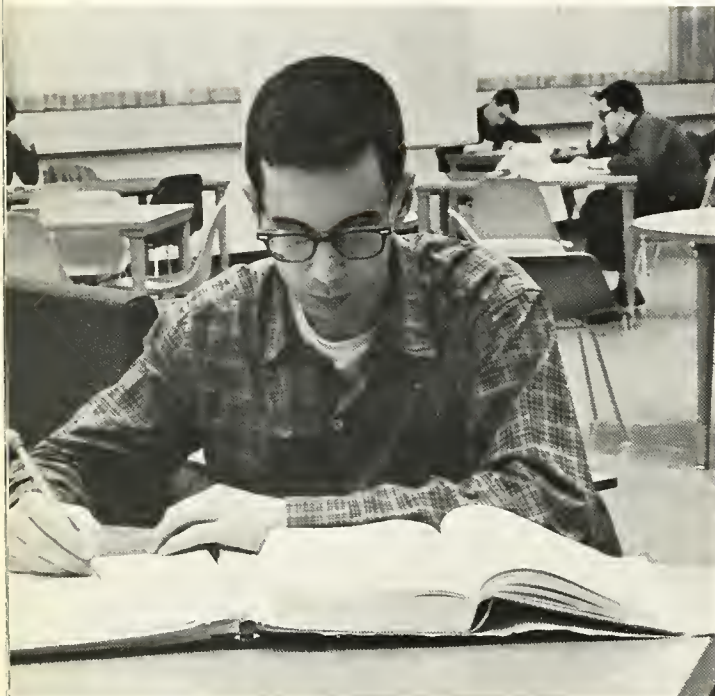

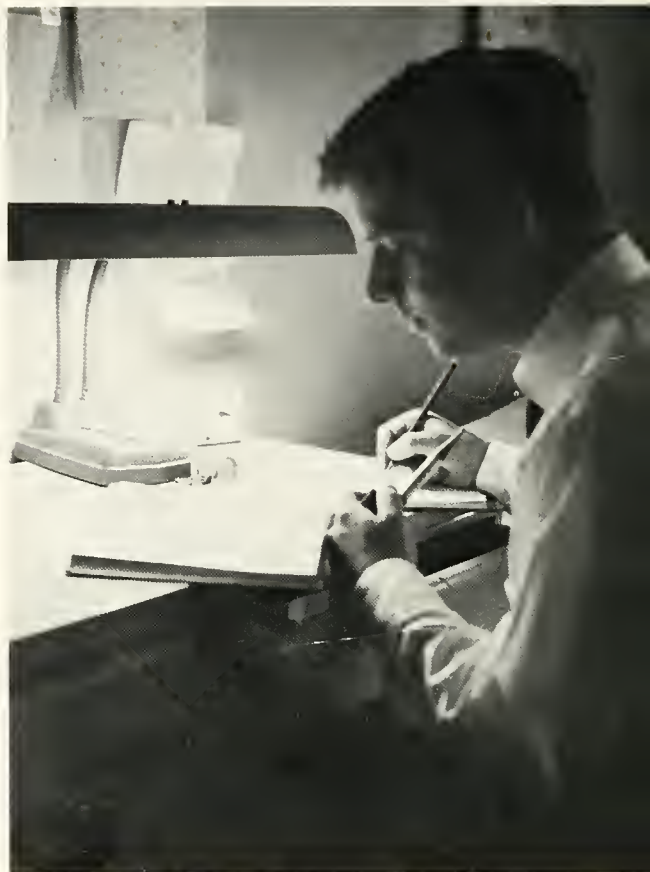

Ron Joseph and Harvey Baker study during a coffee break in the "College Inn."

Tech's Glee Club welcomes Freshman members.

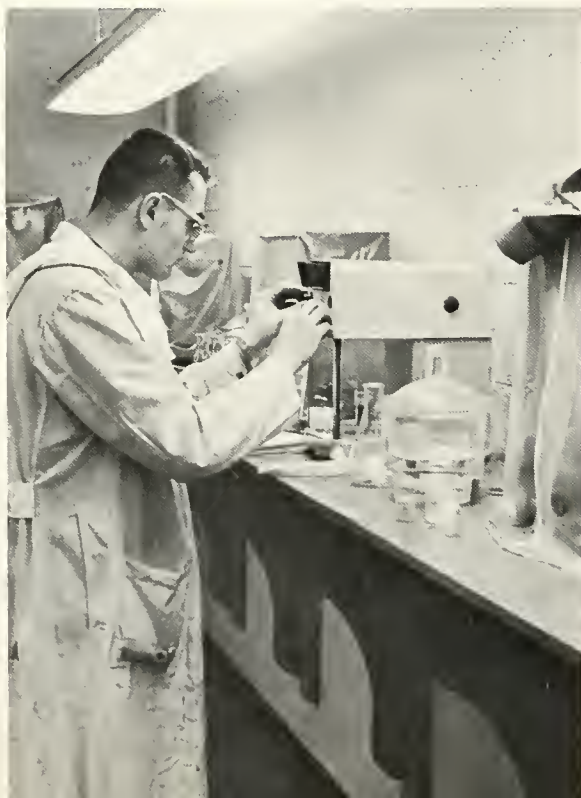

Studying starts early . . .

. . . and ends late.

Dennis Parrott in chem lab.

Henry Cook and Francis Hager—think they need a plumber??

Prof. Guindon and Phil Conarroe—"it has to work that way."

Gerald Lilja and Mike Seaver create a sine wave.

Jim Vesey and Tom Wong—catalyst or catastrophe??

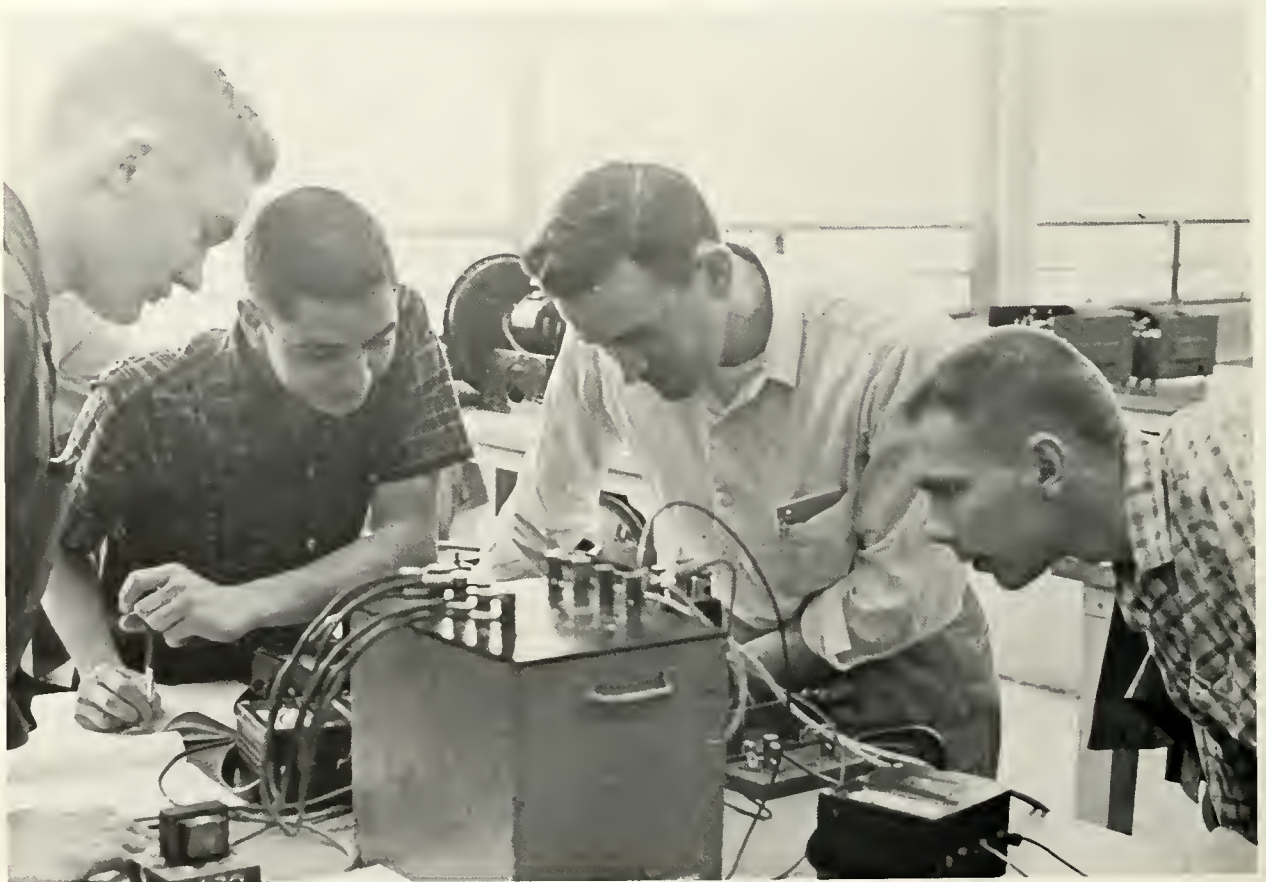

Bob Stavinoga runs into a problem . . .

. . . and gets some help from Earl Maki and Ray Wisniewski.

Some studious electrical majors.

quizzes, midterms, and finals.

The new name was unveiled at the precise moment that chairman Arthur Fruechtenicht pronounced the words, "Indiana Institute of Technology."

Paul McDowell, superintendent of buildings and grounds.

Mrs. Horiak—a good friend to the foreign students.

Christmas vacation and only a few students remain on campus.

Burt Means to keeps us all well fed.

HAIL-ALMA-MATER (HAIL I.T.)

MEREDITH WILLSON

Meredith Willson, composer of our Alma Mater, receives honorary Doctorate.

Handwritten musical score for "Hail Alma Mater". The score is written on a grand staff (treble and bass clefs) with a key signature of one sharp (F#) and a common time signature (C). The lyrics are written below the treble staff.

Lyrics: HAIL AL-MA MA-TER

Lyrics: HAIL TO THEE EACH HAND TO EV-RY HEART OUR

Lyrics: PLEDGE WILL EV-ER BE SING NOW TO-

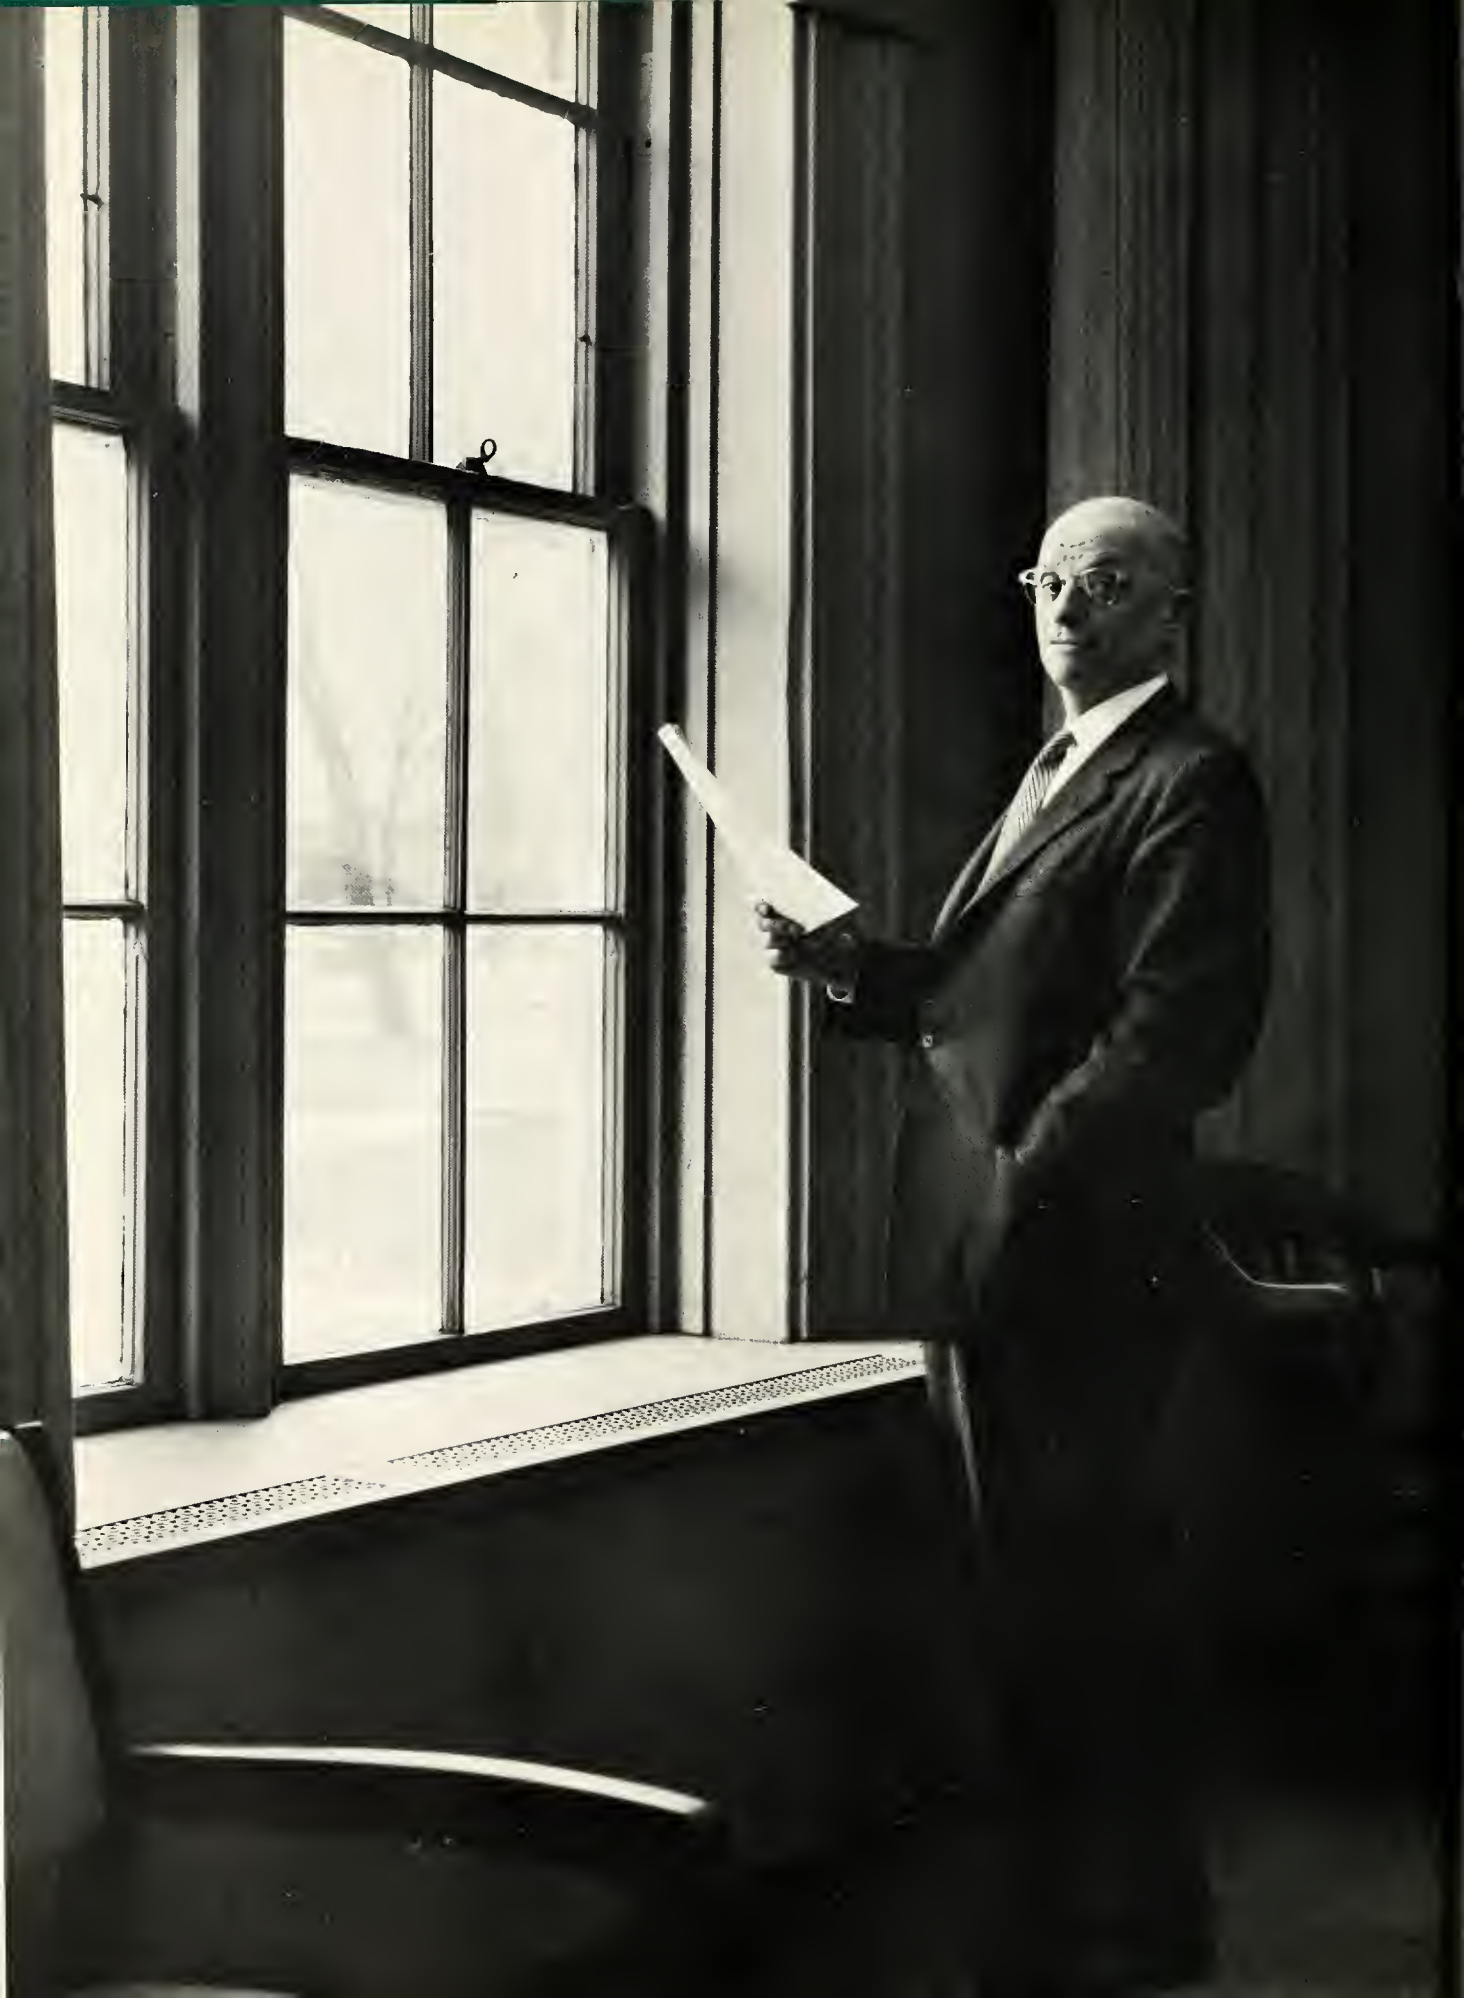

Handwritten musical notation includes notes, rests, and dynamic markings such as *mf* (mezzo-forte) and *p* (piano).

dedication

FOR 27 YEARS

The mentor of faculty, staff, and students;
The guide through perilous and trying times;
The director of progress in spite of great odds;

The patron of a large and challenging family;
This describes President Emeritus Archie T. Keene and his service to Tech. To his devotion and determination, and to the man, we dedicate this 1963 KEKIONGAN.

It is often said that, "Behind every great man there is a woman." Here Mrs. Archie Keene is presented with a special award by Don Temple, president of Indiana Tech's Alumni Association.

Ed Gehringer, a former student of President Keene, is a surprise guest at the "Salute to President Keene" dinner.

aeronautical engineering

The Aeronautical Engineering Department at Indiana Institute of Technology strives to have the student well prepared in the basic sciences before the advanced aeronautical topics are undertaken. A graduate with a B.S. degree in Aeronautical Engineering may enter many phases of the aeronautical field. The ever-increasing advances in the field of aeronautics, such as the earth satellite program, will continue to offer a challenge to the engineer of the present and future.

chemical engineering

The Department of Chemical Engineering aims to develop the student into a well-rounded, competent, and socially adjusted graduate. The development of the ability to THINK is paramount. The project method of instruction is used in the laboratory which is equipped with standard pilot plant apparatus such as stills, evaporators, filter presses, and mass and energy transfer units. The curriculum covers basic sciences, engineering sciences, applied science (engineering), and general subjects, which gives a broad foundation enabling the student to be employed in design, operation, sales, teaching, and research.

Joseph W. Cranmer, John Cochran, Tod B. Dixon (Chairman).

civil engineering

Civil Engineering is the oldest of all the engineering fields. It has always been concerned with projects of both public and private nature that affect the social and economic life of the people.

Originally, Civil Engineering was concerned with the construction of bridges, roads and buildings which are still major areas in the Civil Engineering field. In the last half-century, additional areas have been added to the field of Civil Engineering, such as: water supply, waste disposal, city planning, and traffic engineering. These are of importance for the public health and welfare.

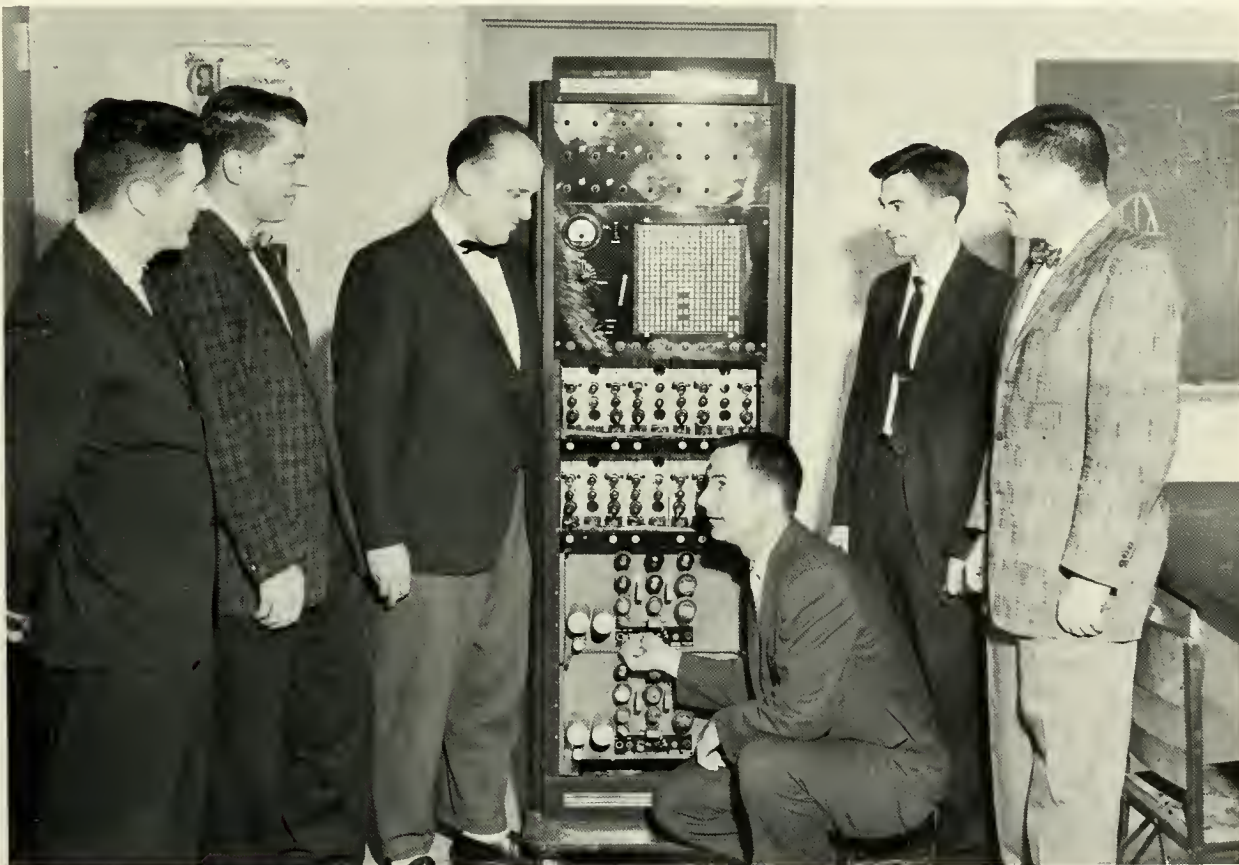

electrical engineering

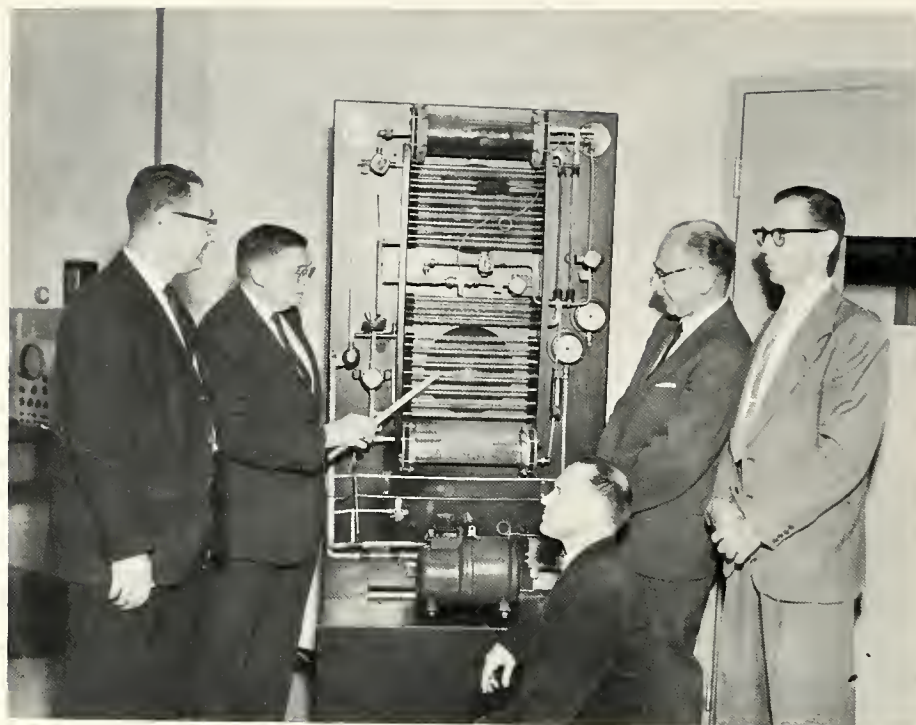

Electrical Engineering encompasses many and varied fields. The graduate electrical engineer may find himself working in the fields of radar, guided missiles and satellites, atomic energy, electronic computers, radio communications, television, control systems, power generation and distribution, and other numerous specialized phases of Electrical Engineering in commercial, industrial and military fields.

Robert C. Ruhl (Chairman), William D. Shrader.

Morris Simmons, Peter Sorenson, John Whitney, Clarence Cain, Arthur Price, Walter J. Williams, Jr. (Chairman).

Robert Marshall, Ivan A. Planck (Chairman), Cleo J. Quinn, Erwin Horiak, Howard A. Macklin.

mechanical engineering

The Mechanical Engineer is responsible for the designing and building of machines to produce power and the machines to utilize that power. Every manufactured article, no matter what its nature, requires the services of Mechanical Engineers both in the design of the machines by which it is manufactured and in the operation of the factory itself.

Creative thinking is nurtured and encouraged in the Mechanical Engineering class rooms and in the Mechanical Engineering Laboratories.

chemistry

Chemistry is the science of change, and serves as one of the main foundation stones for all Science and Engineering. It is one of the essential backgrounds for every educated man in this Technological Age.

The Department of Chemistry not only serves to provide instruction in basic Chemistry for all Science and Engineering disciplines, but offers Advanced Courses in Chemistry for those interested in Research in industry or in further study in Graduate Schools.

Norman O. Long, Chairman; Laszlo Szegedy, Warren Hoffman, Robert Swindell, Robert Blair, Edward Guindon.

Left to right: Alvin Steinbach, Margaret Huff, Loren Yaggy, Mary Weimer (Chairman), Helen Riordan, Darrow Fox, Helen Dinius.

English department

The primary purpose of the English Department in an engineering school is to teach the engineering student to express himself effectively in both speech and writing. The English Department offers courses in composition, literature, and speech so that the student may become a well-rounded person able to meet the challenges in life.

Left to right: Donald Henderson, Harry Mellin, Hugh Harp, Robert Leeper, Gordon Cole, Richard Sarber, Juana Santana, James Dohner, Walter Bartlett, Charles Carr (Chairman).

mathematics department

In our complex society, scientific progress depends on the mathematician, the engineer and many other scientists whose primary tool is mathematics. The Department of Mathematics offers a well-rounded course for the young mathematicians, as well as the essential mathematics for the engineering, physics and chemistry students.

Richard Reeves, Ralph Bracht, Kozaburo Miyakawa (Chairman), Daniel Dwyer, Juana Santana, Chamanlal Patel.

physics department

If, as has been said, "this is the atomic age," then this is the age of physics. Nuclear weapons and machines are products of the physics laboratory. Each new day finds the physicists of our nation ever widening horizons of man's knowledge. Therefore, Indiana Institute of Technology meets the need for training in physics by offering basic and advanced courses designed to prepare a student either for direct participation in industry, or for a scientific career of the more traditional type.

engineering graphics

Engineering Graphics is a descriptive graphical language used by engineers and designers throughout the world to express, develop and record their ideas and information. Men of industry have indicated that Engineering Graphics is not only important, but absolutely necessary. Students must have training in space visualization; they must develop their powers of analysis, synthesis, and creative thinking. Their abilities to develop and record ideas must be constantly challenged.

basketball

Coach Macy directed the Tech basketball team to school records of 20 victories and 89 points averaged per game. The team placed third in the Mid-Central Conference and third in the R.I.T. tourney.

Ron Zigler was chosen the Most Valuable Player as he set a school record of 597 points scored in one season. Les Bridges received the award for the most improved player. Dave Hickman and Ron Zigler were chosen members of the all-conference team.

Larry Beerman, Honorary Captain, is the only man graduating this year. The 12 returning lettermen should give Tech another strong squad next season.

soccer

Coach Ed Morton faced the problem of having just two returning lettermen as a nucleus for this year's team. They were Manoucher Monsef and Jeff Davis.

The Warriors were only able to win their opening game with Goshen College. They then faltered, losing four in a row. They were only able to salvage a tie with Indiana University and then finished the season by losing two more games.

The most outstanding feature of the season was the consistent play of freshman Steven Pittl. In his very first collegiate game he tied the school record for "most goals scored in a single game" with two goals. Other bright spots included the play of Dominic Arbitrio, Manuel Medina, and Wjoah Boayue, all of whom were freshmen.

*Mid-Central Conference Games

baseball

The 1963 Tech baseball team ended the season with five wins and fourteen losses over-all and a 3-5 record in conference games. Don Kiewett earned the team batting crown. Tech's most valuable players were the ace pitcher Dan Lambert, who had four victories, and the hustling shortstop Dan Helker. The team posted a record fielding average of .924. With John Hamilton being the only player to be graduated, the experience gained this year will help in producing a well-rounded team.

ROBERT ASHBY

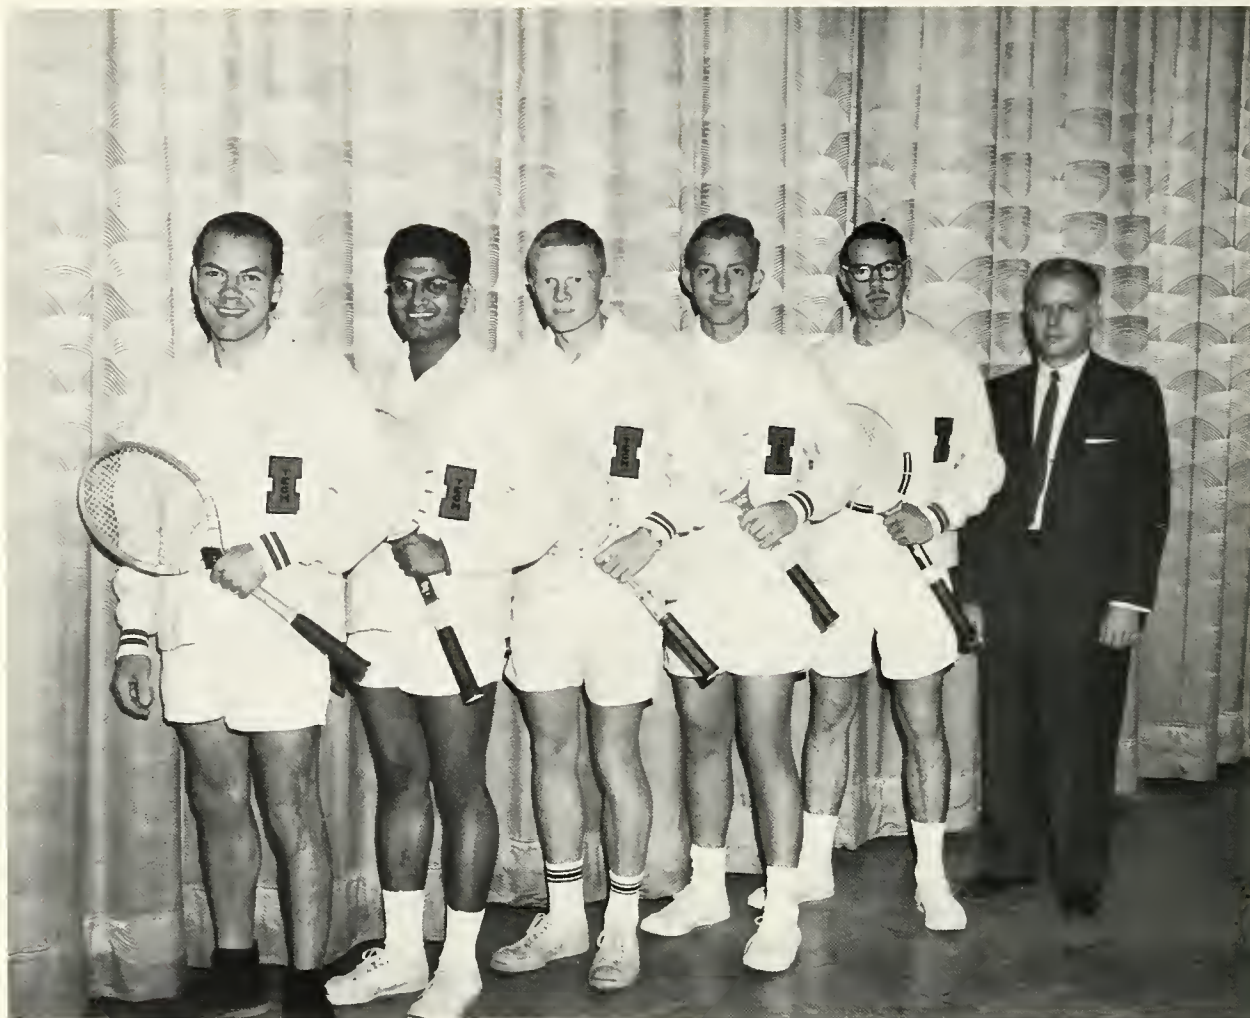

golf team

The Tech putters, coached by Ben Dow, fashioned a 4-3 record in match play. In tournament play, the team placed second in the Mid-Central Conference Tournament and eleventh out of twenty-one colleges in the Little State Annual Golf Match.

Robert Ashby played in the number-one position this year and is the only member to be lost through graduation. Ed Gillen and Woody Stillwagon will be strong contenders for the number-one slot next year.

Ben Dow (Coach), Ed Gillen, Jim Nelson, Larry Beerman, Woodrow Stillwagon, Robert Ashby.

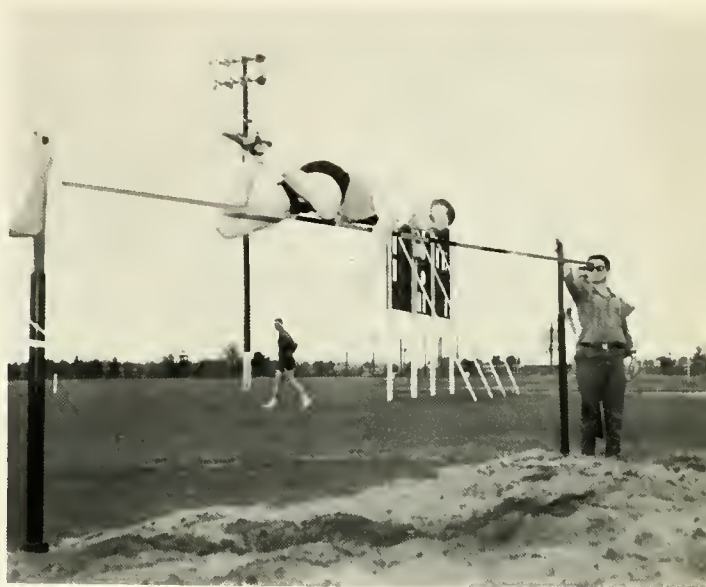

Left to Right: Bob Beaudette, Niru Idgunji, Don Crissman, Howard Grayless, Ernest Young, Ben Dow (coach).

tennis

This season the Tech racketmen, coached by Ben Dow, tied for second place in the Mid-Central Conference with a record of five wins and three losses.

Don Crissman was selected as the Most Valuable Player. Next fall's squad should be strong with the return of Howard Grayless and Don Crissman.

The thin-clads, coached by Bob Macy, were hampered this year by a lack of depth on the team and the loss of half of the practice field. The team's main strength was in the dashes. New school records were set by Gerald Fletcher in the 440-yard dash and Homer Fager, Ted Washington, Charles McKim and Gerald Fletcher in the mile relay. The young team picked up invaluable experience which, coupled with their great spirit, will prove beneficial next year.

Up and over.

iranian student organization

The Iranian Student Club is an organization of students from Iran now studying at Indiana Institute of Technology. Its purpose is to promote better understanding between themselves and the American people, and to assist the students in coming in closer contact with one another.

association of civil engineers

The Association of Civil Engineers of Indiana Institute of Technology is an organization of students and faculty in the civil engineering department.

The purpose of this organization is to attempt to communicate to the student some of the difficulties he will experience in his chosen field. This is accomplished by inviting as guest speakers men from different branches of the civil-engineering field.

the international club

The purposes of the International Club of Indiana Institute of Technology are:

1. To stimulate better student-to-student relationships and understanding through common activities, discussions, and debates on matters of international nature, and through these discussions, to acquaint the students with problems of the world, thus providing the students with the knowledge to converse intelligently on national and international problems;
2. To serve as an area for cultural exchange between both American and Foreign students here on campus;
3. To be the linking medium between all countries, for both the purpose of realizing and analyzing the differences and similarities of the students;
4. To help smooth the adjustment of new students to the cosmopolitan atmosphere on the campus of I. I. T.

institute of electrical and electronic engineers

The Indiana Tech Electrical Association is an association devoted to promoting professional growth in students in the field of Electrical and Electronic Engineering. It prepares the student for his profession by field trips into industry and guest speakers from industry in these fields.

The association is an affiliate of the American Institute of Electrical Engineers, and membership is open to any student enrolled in the electrical or electronic departments.

To be a member of the Chinese Club, one must be of Chinese origin. The primary purpose of this organization is to promote cultural and social relationships for members. This is accomplished by participation in intramural sports, study of both western and oriental cultures, and instillment of a worthy philosophy of life.

institute of aeronautical sciences

The Institute of Aeronautical Sciences is the representative society for engineers, designers, and technical specialists in all of the sciences related to the design and development of airborne craft.

Student membership provides the student engineer or scientist with broad opportunities to engage in activities associated with his future career in aviation.

The Mechanical Engineering Club is an affiliate of the Fort Wayne section of the American Society of Mechanical Engineers. Membership is available to students enrolled in the Mechanical Engineering department.

The purpose of this organization is to advance, promote, and teach new phases of mechanical engineering. This is accomplished by speeches by experienced engineers and field trips to area industry.

kekiongan amateur radio club

The Kekiongan Amateur Radio Club's objectives are to promote amateur radio activities among interested students and to bring together students who have an interest in the practical application of communications.

To qualify for membership, a student or faculty member must have a Federal Communications Commission License ranging from novice to advanced. Instruction for these licenses is provided by the qualified members to those who wish to take the examinations for them.

The Indiana Tech Flying Club was formed to give members an opportunity to fly, to obtain their licenses and to learn to fly at minimum cost. Day and night, local and cross-country flights are made at slight expense of the members. The organization has two planes: a Cessna 140, and a Cessna 120, both of which are hangared at Smith Field. Membership is open to all students and faculty of Indiana Institute of Technology.

indiana tech weight lifting club

The Indiana Tech Weight-Lifting and Body-Building Club began in January of 1958. Its purpose is to promote physical culture and further sportsmanship and teamwork. Teams from the club have entered and have placed satisfactorily in college competition. Membership is available to any student who is not on scholastic probation.

The goal of the Physics Club is the advancement and diffusion of knowledge pertaining to the science of physics and its application to human welfare.

The organization has acquired a laboratory for experimental projects. Besides these projects, the organization's goal is reached by trips into industry and noted lecturers in the field of physics.

The purpose of the organization is to provide better understanding between the Indian students and non-Indian students at Indiana Tech and to extend guidance to new Indian students. Membership is available to any student who is interested in Indian culture.

Our participation in social functions may enhance closer ties between the Indian students and the Americans.

The ACS students' affiliate of Indiana Tech is a Chapter of the American Chemical Society, the world's largest organization devoted to a single science. The purpose of this Club is to create and stimulate interest among students of chemistry and chemical engineering and to help them academically and socially to become better qualified candidates for future positions.

Periodic field trips also help to acquaint the students with industry and give them some insight into the vast potential of their chosen field.

kekiongan

The year 1962-63 has been a period of many changes and challenges for Tech in which we have gained many rich memories. The staff of the 1963 KEKIONGAN hope that this book, in a future time and place, will help us to recall a fond memory or two and make our intellectual growing pains trivia. We have attempted to present through words and photos an attractive record of various events which have highlighted the year and added to our growth.

We of the staff like to feel that we have fulfilled our duty to be a true representative of the students. Our purpose is to represent news and information of importance to all at Indiana Tech.

We believe in Indiana Tech and its principles, and we consistently support all organizations and programs which contribute to the welfare and progress of the college. Whenever criticisms are leveled, we intend them to be constructive, and in keeping with our policy of responsible reporting.

bowling team

Indiana Tech's bowling team is a member of the National Intercollegiate Bowling Association, the first national college association for bowling. The matches, except for the roll-offs, are all postal matches to determine the championship.

During the 1962-63 season, the Indiana Tech team competed with Carnegie Tech, University of Pittsburgh and the University of Akron. The team placed third in season competition which entitled them to bowl in the roll-offs with the teams from Pittsburgh and Akron at Ohio State University. The Tech team came in third.

This year, for the first time, the members of the intercollegiate bowling team were awarded letters by the school.

Organized in July of 1957, the purpose of Indiana Tech Students' Wives Club has been to further social activities, acquaintances, and friendship among the wives of students of IIT. Wives of all married students of IIT are eligible for membership.

The club arranges programs of varied types for the members. These may range from an address on the social problems of our time by a local authority to bingo or a humorous skit given by members of the Club.

It is also the purpose of Indiana Tech Students' Wives Club to contribute to and work for the good of the College whenever possible.

At banquets held twice annually wives of graduating students are presented with their P.H.T. (Putting Hubby Through) degrees.

alpha gamma upsilon

Beta Chapter of The Alpha Gamma Upsilon was accepted by Indiana Institute of Technology in May, 1932—the first fraternity installed in the College. The aim and purpose of Alpha Gamma Upsilon is summed up briefly in the following passage: "This fraternity shall be a secret fraternal organization whose aim and purpose is to promote friendship, comradeship, and mutual understanding among the members; to develop character; to uphold the ideals of the College, and to foster the highest ideals of ethical conduct and good citizenship."

The one-time local Kappa Sigma Phi was installed April 27-28, 1963, as the Iota Lambda chapter of Tau Kappa Epsilon. Love, Charity, and Esteem, these are the guiding lights of Teke. These all boil down to brotherhood, a main goal of our fraternity. We believe that a fraternity is not solely made great by its fraters but also by the keen competition pressed upon it by the other organizations. Tau Kappa Epsilon is the largest national fraternity and is constantly expanding by initiating top local fraternities on campuses across the United States.

theta mu pi

Originally organized at Indiana Institute of Technology in January, 1957, Theta Mu Pi Fraternity places special importance on three items: EQUALITY, UNDERSTANDING, and UNITY. A constructive pledge program with no hazing or degradation of any sort, as well as special stress being placed on high scholarship as a requisite to a successful fraternity, are an integral part of the program. All members are accepted solely on their own individual worth, regardless of race, color, or creed.

Phi Kappa Lambda offers a brotherhood fraternity for the Catholic students at Indiana Tech. Phi Kappa was the name selected by the membership to serve as the outward sign of an organization that endeavors to promote conduct consistent with good morals, and an active Catholic faith, creating an atmosphere which will stimulate substantial intellectual progress and scholastic achievement; and also to promote principles of fraternal loyalty through brotherhood.

sigma phi delta

The purpose of Sigma Phi Delta is to promote advancement of the engineering profession; to foster the advancement of engineering education; to instill a greater spirit of cooperation among engineering students and organizations; to inculcate in its members the highest ideals of good citizenship, Christian manhood, obedience to law and to brotherhood; and to encourage excellence in scholarship.

The fraternity was founded at the University of Southern California in April, 1924. The membership totals nearly 4,000 engineers and engineering students.

Theta Tau Upsilon Fraternity was originated on April 7, 1962, by sixteen students of Indiana Institute of Technology with the basic purpose of becoming a National Fraternity. The membership grew until 38 men were granted charter membership.

The members then resigned themselves to the task of reaching the initial goal. The Fraternity standards were established to instill a strong foundation and to make membership a true honor and privilege.

The basic ideals of the Fraternity were to promote high academic standards, provide a useful service to college and community, to guide and manage gentlemanly conduct at all times, to always put forth with highest moral character, and to develop an unsurpassable union of brotherhood that will serve as a guide throughout a lifetime.

theta xi

The purpose of Theta Xi (formerly Kappa Sigma Kappa) is to develop and enhance the personality of its members, to encourage scholastic achievement and good conduct, broaden outside interests, promote mutual understanding and increase loyalty on the part of the fraternity brothers to Indiana Tech. Membership is open to all male students of Indiana Tech.

Kappa Alpha Psi, a college fraternity now comprised of more than 200 undergraduate and alumni chapters on major campuses and in cities throughout the country, boasts a membership of over 20,000. It was founded in the school year of 1910-1911 on the campus of Indiana University at Bloomington, Indiana. Its constitution is the law of an organization predicated upon, and dedicated to, the principles of achievement through a democratic fraternity.

Preparation of the coat of arms was completed during the summer of 1911 by three of the founders who solicited the aid of a professor of Greek Art at the Indiana University together with that of a professor of Greek at Concordia University. The second chapter of Kappa Alpha Psi was chartered in 1913.

iota tau kappa

Iota Tau Kappa is an honorary engineering fraternity whose name symbolized Industry (Iota), Thrift (Tau), and Knowledge (Kappa). The chief objective of this organization is to promote and to inculcate high ideals and attitudes of scholarship among the members of the student body of Indiana Institute of Technology. In order to become a member of Iota Tau Kappa, an engineering student must have a grade-point average of 3.5 or more for four terms, not necessarily consecutive terms. At least sixteen college credit hours shall comprise each of these four terms.

tech alumni association

Bob Harold is the Executive Secretary of the National Alumni Association. The national association maintains records on all members: active, sustaining, honorary and associate. It provides assistance to all graduates in their school, business and social life.

Contrary to popular belief, the Alumni Relations Office, located on Center Drive, just south of the President's Office, is not operated exclusively for Indiana Tech graduates.

On-campus students are invited to visit the offices at any time when the staff can offer constructive counsel regarding campus or alumni activities. Any student is welcome to drop in for a visit if for no other purpose than to learn what the National Alumni Association accomplishes for its members and what is expected of graduates after they have left the campus.

The Association looks on each student as a potential alumnus, who will some day become a vital part of the foundation on which the College is built. College graduates everywhere share the psychological urge to be identified as a member of the group, which is perhaps better described as the desire for "belonging." Truly once a student earns the title *alumnus*, he enters an exciting new part of the brotherhood of man.

Alumni Homecoming is a big annual event on campus, but graduates and former students are welcome to visit any time.

public relations

Any College is what it is perceived to be. The Public Relations Office is charged with the responsibility of determining what the image of Indiana Institute of Technology is and with seeing that this image is an accurate reflection of the many facets of the College. In order to properly fill its *raison d'être*, the Public Relations Office must interrelate a complex of publics, including students, faculty, alumni, community, business, religious, and many other groups. Each year many students become familiar with this office because of the service it renders in aiding them with special and extracurricular events. As a result of this service and the nature of its function, the Public Relations Office also helps the student gain an awareness of many other groups and organizations outside the sphere of school activities.

Winifred Troyer, Public Relations staff secretary, prepares a publicity information card for the extensive records maintained by the Public Relations Office.

Lou Culp is Director of both Public and Alumni Relations for the College, and also handles the activities of the News Bureau. Offices for all three areas of activity are located in Summit House on Center Drive.

Right, Harold Belt, working in conjunction with Vice-president and Treasurer C. A. Overholt, reports directly to President Keene on long-range College development and financing.
